KANAMUKKALA SUHAIL

Machine Learning & Python Developer

Phone: +91 97014 62356 | Email: suhailkanamukkala@gmail.com | LinkedIn: click here | GitHub: click here | LeetCode: click here

PROFESSIONAL SUMMARY

Computer Science (AI & ML) student with knowledge of fundamentals in Python, core Machine Learning algorithms, database design, and web backend architecture. Hands-on experience developing ML models from scratch and building scalable, full-stack web applications using Django and PostgreSQL. Solved over 250+ problems solved on LeetCode. Eager to contribute as a Machine Learning & Python Developer intern to build scalable AI/ML solutions and web applications.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Machine Learning:** Supervised & Unsupervised Learning (Linear/Logistic Regression, Polynomial Regression, KNN, SVM, Decision Trees, Random Forests, Naive Bayes, K-Means Clustering, Hierarchical Clustering)
- **Web & Backend Frameworks:** Django, HTML5, CSS3, JavaScript
- **Databases:** PostgreSQL, Oracle, MySQL
- **Tools & Developer Platforms:** Git, GitHub, VS Code

KEY PROJECTS

Real-Time Chat Application | *Python, Django, PostgreSQL, HTML/CSS, JavaScript, Git / github link / deploy link*

Built a full-stack real-time web application featuring secure user authentication, profile management, and active session handling, with Gmail SMTP integrated for asynchronous email verification and password recovery. Designed and optimized PostgreSQL schemas to efficiently model users, friendships, and real-time message streams, and developed a responsive front-end UI using JavaScript, HTML, and CSS seamlessly integrated with Django backend endpoints.

Bhagavad Gita Insights Emotion Based Verse Recommender | *Python, NumPy, Pandas, Scikit-learn, ML(Knn) / github link*

Built an emotion-based recommendation system that maps user feelings to relevant Bhagavad Gita verses using K-Nearest Neighbors (KNN) classification, engineering a 15-dimensional emotion feature vector from natural-language input via keyword-based text normalization and matching, and processed and modeled a 700-verse dataset with multilingual fields (Sanskrit, Hindi, English) using Pandas and scikit-learn.

Machine Learning Algorithms Implementation (From Scratch) | *Python, NumPy, Math Libraries*

- Simple Linear Regression, Multi Linear Regression , K-Nearest Neighbor(KNN)

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML) *(2024 – Present)*

Mahatma Gandhi Institute of Technology • **CGPA: 8.36 / 10.0 (5 Semesters)**

Higher Secondary Education (12th Grade) *(2022 – 2024)*

Sri Chaitanya Junior College • **Score: 927 / 1000**

Secondary School Certificate (10th Grade) *(2020 – 2022)*

Sri Chaitanya High School • **CGPA: 9.5 / 10.0**

CERTIFICATIONS & ACHIEVEMENTS

LeetCode: Solved 250+ problems.

GeeksforGeeks Certificate: Python Django Developer Certified

Udemy course : Machine Learning A-Z.
